Filestack is a service for instantly upload and store files to a safe place on the web. If you have a large music collection on your PC or Mac, filestack can also make it available to your friends to listen to on their smartphones, tablets, or other devices. Conversion Overview: When you upload a file to filestack, we convert it and run various algorithms to ensure the best possible quality for each file. We then store the file in a database that is accessible online. This is where the magic happens: we host your files for free so that they can be used as you see fit. You can access them from a variety of different devices and computers. If you want to share your files online with friends, family, and colleagues, then you can upload them to the web, Facebook, Twitter, email, or a variety of other platforms. If you are using your files on your mobile device, you can stream them

to your phone, tablet, or other device with the free filestack app. For added security, we can encrypt your files with 256-bit AES, so they cannot be viewed without the proper access codes. Integrations: When uploading a file to filestack, you can also provide additional information about the file, such as the file name, file size, and video duration. You can also include a note with each file that gives an overview of the song. Filestack is the best place to find your songs when you need to retrieve them quickly. You can listen to your entire collection on your desktop, phone, tablet, or other device. Alternatively, you can share your playlist or single file with friends and followers on Facebook, Twitter, Google+, and more. Premium Features: The Premium plan unlocks some exclusive features for a limited time and gives you early access to features that are usually released in the future. It also lets you manage multiple files at once and create playlists of multiple files. Screenshots: Files2.plist is an easy to use and free app for creating, organizing and editing.plist files.
