Keymacro is a really small lightweight utility designed to help you perform macros in Microsoft Excel, which allows you to rapidly copy, format, and create new macros. It has a real-time visual feedback, which enables you to see the result immediately after hitting the button. Keymacro is a nice tool which combines the convenience of a simple interface with the power of code. It is an essential tool to have in a developer's toolkit. Text Compare Activation Code is a lightweight piece of software that allows you to compare all sorts of text files and seamlessly identify any modifications made. Comes with an outdated, but intuitive and organized interface The setup is as simple as it gets, meaning that it entails you decompress the archive in the desired location on your hard disk. Upon launch, you are welcomed by a minimalistic and rugged, yet well-structured and appropriate UI for an application in this category. The interface is comprised of two panels that display the content of both text files you loaded. After you have specified their location and hit the Compare function, you can preview the changes made highlighted in different colors. Therefore, new or changed lines are marked with green for the first document and with red for the second one. In case you want to make any modifications, then you will be happy to learn the program comes with a built-in editor. Enables you to view the changes in highlight It is worth mentioning that the program lets you preview solely the differences between the two documents, a feature that can come in handy when you are exploring a report that you recently shared with your team. At the same time, the feature can be helpful if you are analyzing documents that you made unintended modifications to, for example. Since the utility is designed to aid you in comparing any text file, it comes with a function that allows you to highlight only the moved or copied lines. The option can prove invaluable for a developer who is currently reviewing and editing the source code, for instance. As a side note, the tool works with a plethora of text files, including HTML, XML and INI file formats. A useful app for anyone sharing documents In the eventuality that you need to identify any changes made to a text file, such as the source code for an application you are developing, for instance, quickly and without too much hassle, then perhaps Text Compare could come in handy. Text Compare is a lightweight piece of software that allows you to compare all sorts of text files and seamlessly identify any modifications made 2edc1e01e8
