The first step in creating a new project is to save it. In addition to saving file formats, you can always save to a folder or a URL. For example, you could save a new project to a folder on your hard drive called \"Photoshop Projects\" or you could use a file URL, which basically points to an online folder. When you save, you choose where to save the project (i.e., on your hard drive on your computer or on a web server). e3d0a04c9c
